

Company Profile

YXELIA | YXELIA.COM | +31 20 46 46 46 46

« We use creative services and products to deliver inventive solutions »

Created by experts in the area of IT, Network & Mobile technologies, YXELIA was founded on the basis of efficiency and commitment.

YXELIA's main assets are :

- Rich understanding of the Telecom sector and its **challenges**
- **In-depth expertise** in IT, Network & Mobile technologies
- Experience with **large-scale projects**

YXELIA supports its customers to :

- Optimize **costs** & increase **Revenue & Productivity**
- Define a sustainable and profitable **business strategy**
- Move to the **next-generation** technologies
- Address all communication needs **of the Digital Enterprise**

« At the convergence of IP technologies: LAN/WAN, Fixed and Mobile Telecom, Cable TV, Security and Interoperability »

YXELIA's added value is in :

- A deep knowledge of network **infrastructure** management techniques
- **In-depth expertise in** mobile technologies
- Capacity to design efficient IT applications with mobility issues
- Experience with **large-scale projects and design in competitive countries**
- Particular concern on **security** and **interoperability**
- Long history in addressing **Telecom companies** outsourcing needs

YXELIA is the perfect partner of its clients :

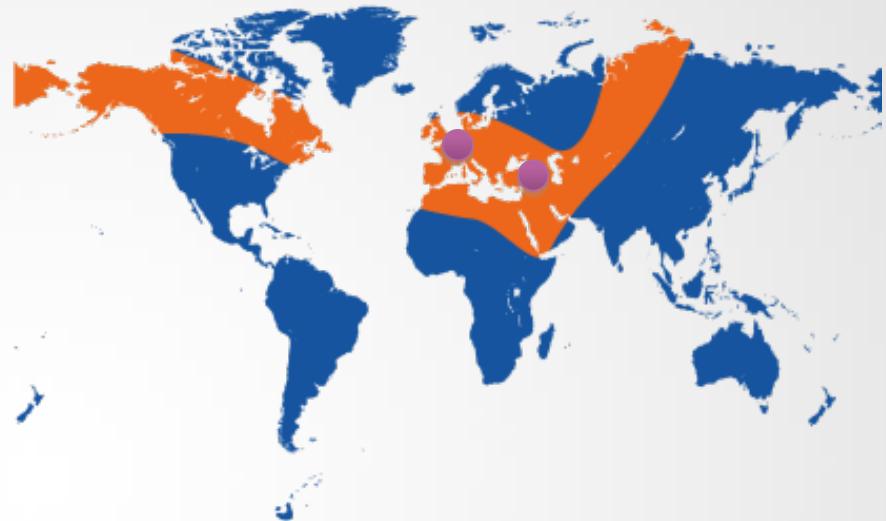

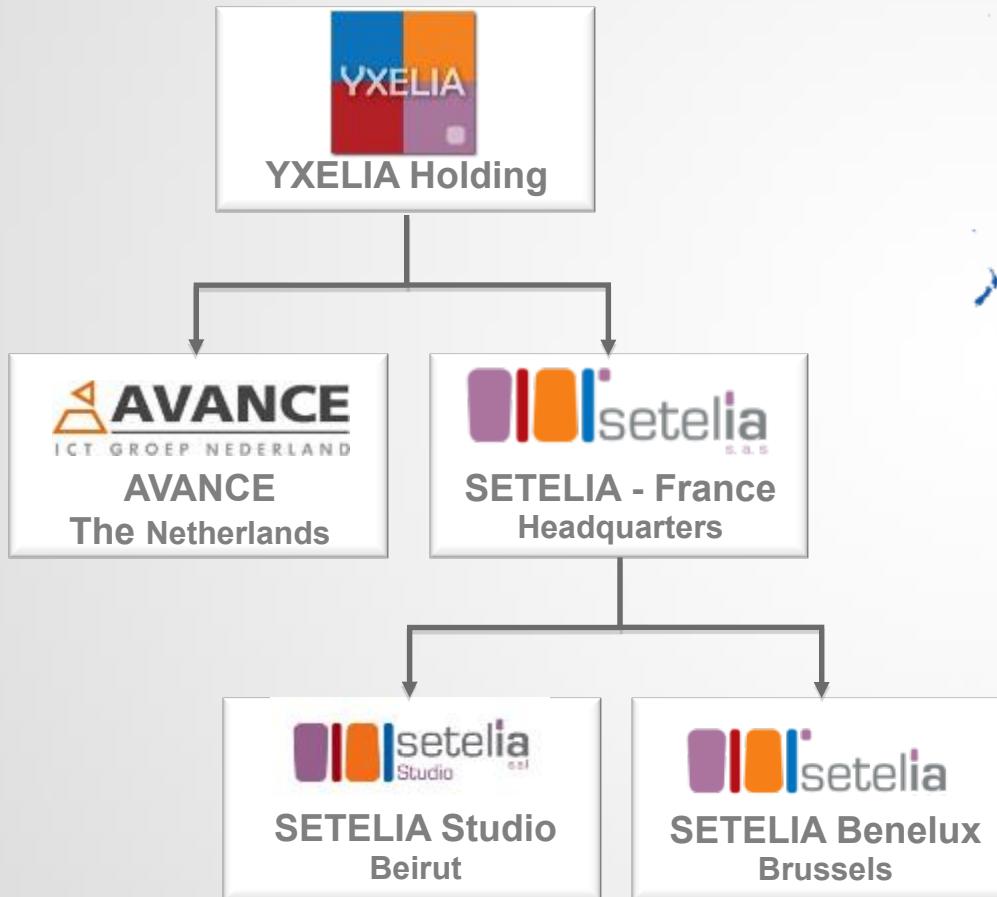

- For increasing efficiency of **Marketing** campaigns
- For managing **the fleet of terminals**, with user support
- For designing powerful **digital applications** to increase productivity
- For designing **connected objects**, **NFC** applications
- For assisting **telecom companies** in their business procedures
- For managing the **Network infrastructure** (administration, virtualization, applications packaging, remote monitoring, security...)

Key figures

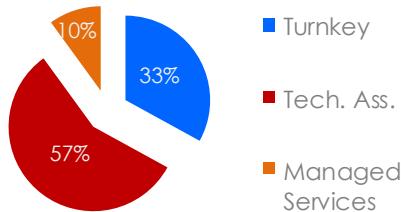

Created in 2005

Team: >350 employees

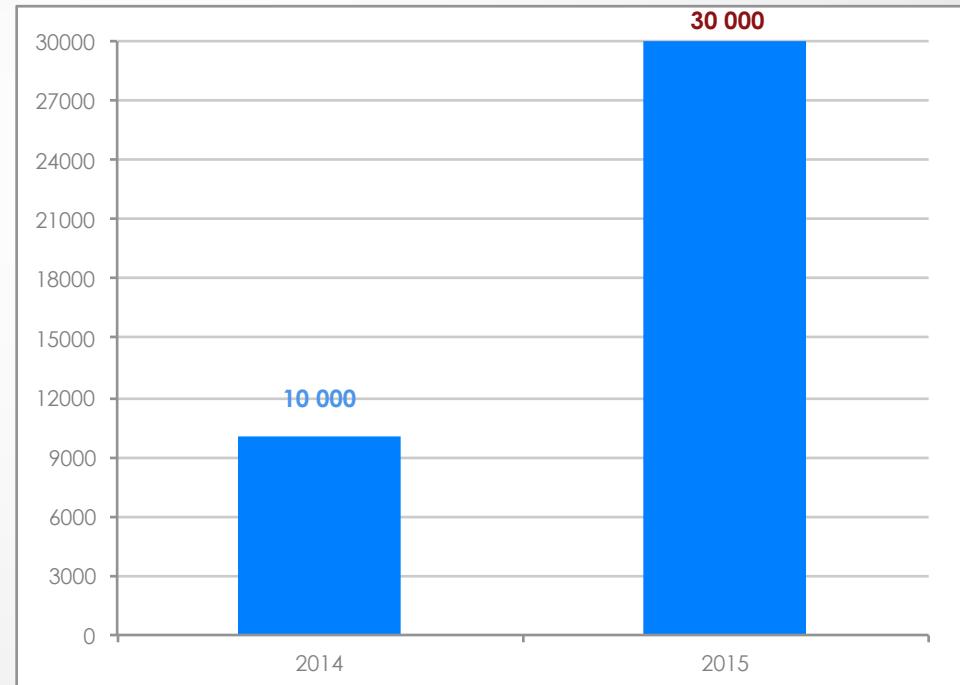

Team Structure

Types of contracts

Turnover (k€)

ISO standards in Yxelia Group

5 standards carried by the company

- GCF Field Trial Recognized Test Organisation:
 - Device Test House Expertise
- ISO 17025:2005
 - Expertise in Validation
- ISO 9001:2008:
 - Quality management system
- ISO 14001:2004:
 - Environmental management system
- ISO 27001:2013:
 - management of information security (certification in progress)

Areas of Expertise

Mobile Devices

- GCF Field Trials (RTO)
- Device validation (IOT, Protocol, Functional and Field Testing)
- Test benches
- NFC/SIM Expertise
- Fleet & embedded apps Management
- End user support

IT Systems & Networks

- NW implementation & operations
- IP Solutions
- Applications Packaging
- Cloud Computing
- DB integration & management
- Virtualization/Storage
- Network security

Telecom Operator Networks

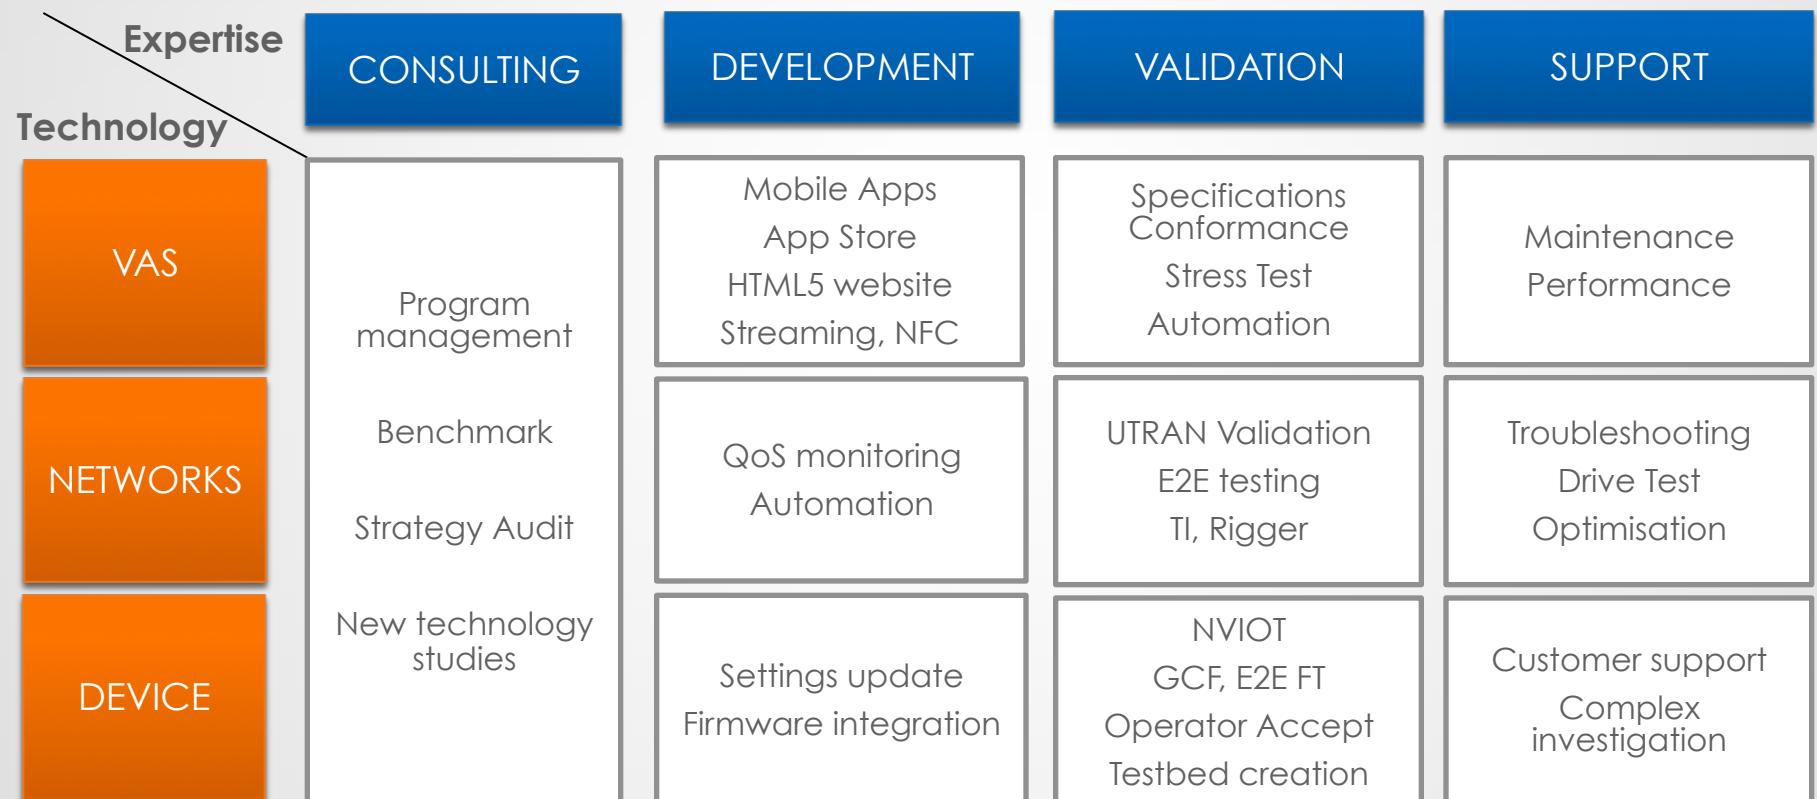

- Engineering
- Deployment of New Generation Fixed & Mobile Networks
- Optimization
- Coverage Benchmark
- QoS analysis
- RAN/UTRAN validation
- Set top box validation for triple and quadruple play

Mobility Applications

- Applications for Marketing
- Strategies
- Apps testing and certification
- Multi OS Development (iOS, Android, Windows,...)
- Stores, Portals, IT apps with Mobility
- Contactless applications for tracking and location
- BPR with digital efficiency
- Secured mobile payment solutions

End 2 End Telecom Expertise

One Stop Shop Solution

Yxelia: A leading IP Convergence Player

Yxelia is the right partner for you

We have extensive experience in connecting landlines, mobiles and LAN

Our main assets are:

- High IP Expertise
- Skilled resources (technical, Project Management...)
- Numerous IP Projects

Cloud & Virtualization

Infrastructure as a Service (IaaS)

Virtualize and optimize in the cloud:

- Run multiple operating systems and multiple applications on the same server at the same time
- Outsource your computing resources
- Sync instantaneously across all devices
- Benefit from the highest security standards
- Forget about hardware and software maintenance

Packaging Services

Automating, Optimizing & Repackaging software

We provide expertise in

- Application Management
- Application & package compatibility
- Distribution Management
- Packaging as a Service
- Skilled supportdesk 24/7
- Managed services
- Service level agreements

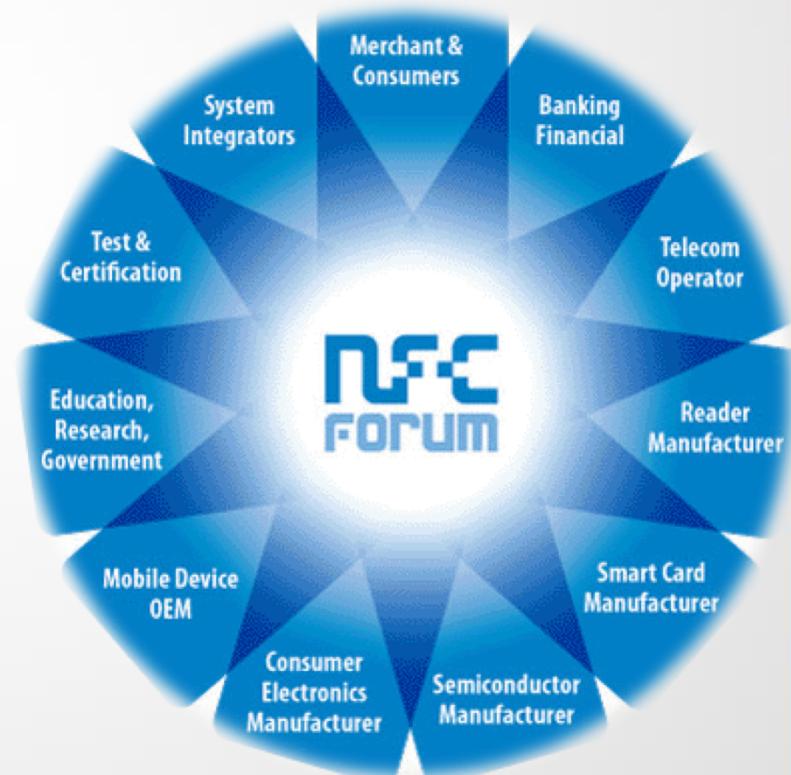

NFC Services

Take the advantage of our NFC ecosystem

An end-to-end NFC ecosystem to control a complex technology:

- Define your strategy and select the right industry actors related to the NFC services with our NFC consulting team
- Follow the last updates on the standardization with our experts in charge of NFC specification at the GSMA
- Trust our development team to build your Mobile App using NFC capabilities
- Improve the quality of your service with our End to End NFC testbench
